

McAndrews, Held & Malloy was one of only three intellectual property and technology firms in the nation to be included in Kimm Alayne Walton's book, "America's Greatest Places to Work With A Law Degree."

MCANDREWS, HELD, & MALLOY, LTD. CAREER OPPORTUNITIES

McAndrews, Held & Malloy's recruiting efforts are designed to achieve one goal – to attract the most exceptional intellectual property and technology-focused attorneys the legal world has to offer. Growing steadily at an attorney-by-attorney pace rather than by merger or acquisition, our firm today is regarded as one of the most successful litigation-focused mega-boutiques in the industry.

REAL-WORLD EXPERIENCE

The success of our summer associate program has helped fuel our growth. Each year, the program attracts some of the brightest law school students in the nation, all of whom bring advanced technical training and/or academic degrees along with their legal credentials. More than 75 percent of our current partners began their careers with us as summer associates.

Continually developing our summer associates to be the best in the field, each is partnered with two attorneys – an associate and a board member – who serve as resources on all aspects of the firm and its practice. Our summer associates work on assignments of importance to our clients and our firm, including researching a variety of legal topics, drafting briefs and legal memoranda, as well as preparing for and attending depositions, trials, hearings and appellate arguments. In addition, due to our firm's partnership with the Legal Aid Foundation, our summer associates assist with SSI appeals for disabled children, as well as with cases involving the Violence Against Women Act.

Due to our firm's active role among legal and other professional and industry trade associations, our summer associates are kept aware of the latest legal developments that might impact our clients. Our firm provides summaries of Federal Circuit

decisions as they are issued, as well as advance sheets for all published patent, trademark, copyright and antitrust decisions. We also encourage our staff to take an active role in Continuing Legal Education programs to ensure that we remain a constant source of superior counsel to our clients.

WORK HARD, PLAY HARD

Golf outings, major league baseball games, picnics and scavenger hunts throughout Chicago are just some of the activities that McAndrews, Held & Malloy summer associates enjoy. At these functions and at other informal gatherings, our summer associates learn more about the firm in a relaxed environment and get better acquainted with senior attorneys on a more personal level.

JOIN OUR TEAM

We seek highly motivated individuals who possess excellent academic credentials, as well as outstanding communication skills. We also prefer applicants with a bachelor's or graduate-level engineering, chemistry, computer science or physics degree, or a Ph.D.-level biotechnology-related degree.

Additional information on our summer associate program can be found at <http://www.mhmlaw.com>. Attorneys and law clerks should mail or e-mail a resume, transcripts and a writing sample (if appropriate) to Debi Lietz, Recruiting Coordinator, at dlietz@mhmlaw.com.
